

**IN THE SPECIFICATION:**

Page 4, last paragraph, replace with a new paragraph as follows:

-- In Fig. 1 and Fig. 2, the hand-guided working tool 10 according to the invention is shown as a setting tool, which is driven using a combustible gas. The setting tool has a housing 1, in which a setting mechanism 15 is arranged, by a fastener element 40 to be driven into a substrate (not shown herein). The fastener element 40 moves over the setting side end 18 of the driving piston and is driven into a substrate when the working tool 10 or setting tool is pressed against the substrate. -- .
